

SIMATS ENGINEERING

ASSESSMENT TOOL 3

Student Name: Aswitha S

Register No:192471001

COURSE NAME: INTERNET PROGRAMMING

COURSE CODE: CSA43

COURSE OUTCOME COVERED

CO-1: Develop well-structured, standards-compliant web pages using HTML/XHTML and XML, and apply Internet protocols and HTTP communication mechanisms for web content delivery. (L2)

Assessment Tool: Case Study

Weightage: 10%

Scenario: Web Development Standards Implementation

A startup is developing a modern web application. During development, the team encounters multiple issues related to HTML elements, HTTP methods, XML syntax, and web communication protocols.

The following observations are made:

- The team needs to embed a promotional video on the homepage.
- A registration form must securely send user data to the server.
- The navigation menu must follow semantic HTML standards.
- XML configuration files are being used but contain syntax errors.
- The application must communicate over the correct web protocol.

Questions:

1. Select the **correct HTML tag for video embedding** and justify your answer.
2. Identify the **appropriate HTTP method for form submission** and explain why.
3. Choose the **proper semantic element for navigation** and justify its usage.
4. Identify the **correct XML syntax** and explain the error in other options.
5. Choose the **correct protocol for web communication** and justify your choice.

SIMATS ENGINEERING

Assessment Tool 3 - Internet Programming

Case Study : Web Development Standards Implementation

1 Semantic Navigation Menu

Home Services Products Contact

Correct Element: <nav>

The <nav> element is the semantic HTML tag used for website navigation.

2 Promotional Video

Correct Tag: <video>

3 Secure Registration Form

Name

Email

Password

Register

Method Used: POST

POST securely sends user data inside the request body.

4 XML Configuration File

```
<note>
  <to>User</to>
  <from>Admin</from>
</note>
```

✓ All opening tags have corresponding closing tags.

5 Web Communication Protocols

Protocol	Purpose	Status
HTTP	Web Communication	✓ Correct
FTP	File Transfer	✗
SMTP	Email Transfer	✗
SNMP	Network Monitoring	✗

✓ Final Conclusion

- Video uses the HTML5 **<video>** tag.
- Registration uses the **POST** method.
- Navigation uses the semantic **<nav>** element.
- XML tags are properly opened and closed.
- **HTTP** is the standard protocol for web communication.
